

G/L Cross Reference Formats

Last Modified on 05/18/2023 3:27 pm EDT

If you have transactions you need to import from another system, but the account#'s do not match up with SGA account#'s then you can set up a cross reference to match them up.

Format: A unique name to identify a set of cross reference numbers.

See [G/L Cross Reference Accounts](#) for more information.
