Asset Tasks Mass Disposals

Records > Objects

Important: Only one Asset Period & one Disposal Date can be chosen for each mass disposal. There isn't an option to undo; please verify the Object #s, Asset Period, & Disposal Dates are correct before processing.

Mass Disposal via Multi-Select Checkboxes:

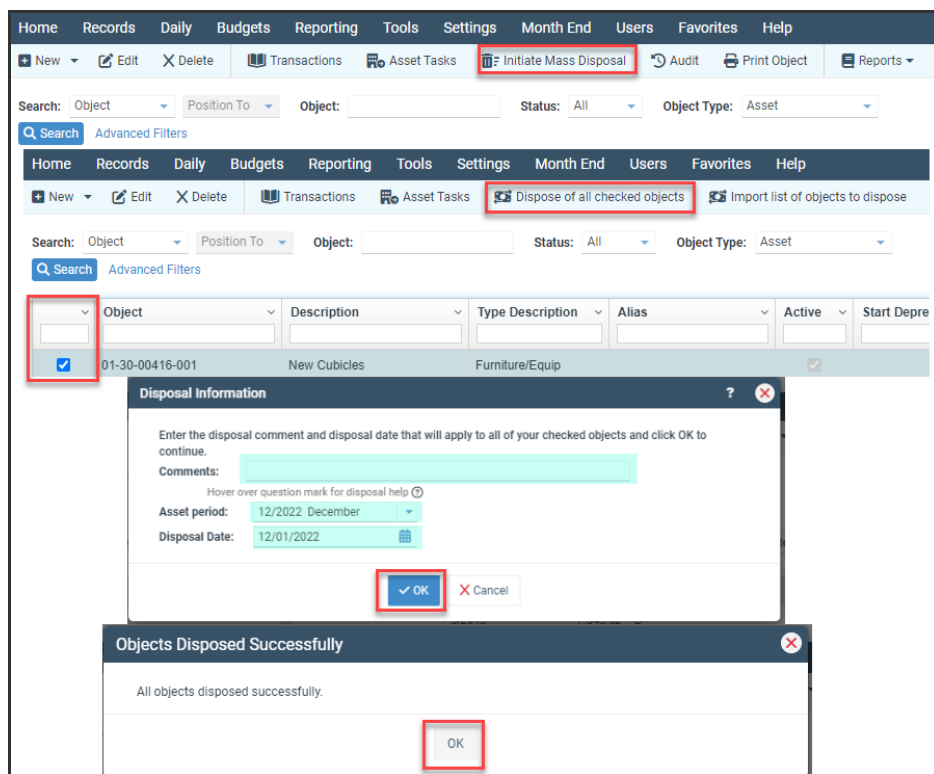

Step 1: Navigate to *Records > Objects* & click **Initiate Mass Disposal**

- After clicking *Initiate Mass Disposal*, checkboxes will appear to the left of the Object #.

Step 2: Select the objects to be disposed of & click **Dispose of all checked Objects**

Step 3: Add Disposal Comments, choose the Asset Period & Disposal Date & click **OK**.

- After clicking **OK**, the system will run through each asset identified and process disposal on each. **Please do not navigate away from the screen while the process is running.**
- When complete, a message will appear that confirms all Objects were disposed of successfully.

Mass Disposal via Import:

Step 1: Navigate to *Records > Objects* & click **Initiate Mass Disposal**.

Step 2: Click **Import list of objects to dispose**.

Step 3: Click **Edit** on the Connection String, define the fields on the Connection String Builder screen to match the type of file you will be importing, and click **OK**.

Step 4: On the next screen, type in the Object Column number & Click **OK**.

Step 5: Select the File and click OK. Then click No on the Upload schema file and OK on **Import Complete**.

Step 6: Review the Imported Objects to Dispose of, and after reviewing them, click **OK**.

Step 7: Add Disposal Comments, choose the Asset Period & Disposal Date & click **OK**.

- After clicking **OK**, the system will run through each asset identified and process disposal on each. Please do not navigate away from the screen while the process is running.
- When complete, a message will appear that confirms all Objects were disposed of successfully.

The image displays four sequential screenshots of a software interface, illustrating the steps for initiating mass disposal:

- Step 1:** The main menu bar is visible, with the "Initiate Mass Disposal" option highlighted in the "Tools" section.
- Step 2:** The "Import list of objects to dispose" button is highlighted in the main menu.
- Step 3:** The "Connection String Builder" dialog box is shown, with the "Excel" connection type selected. The "Provider" is set to "Microsoft.ACE.OLEDB.12.0" and the "Version" is "2007 or later". The "Sheet Name" is "Sheet1".
- Step 4:** The "Import List of Objects to Dispose" dialog box is shown, with the "Object Column" field set to "1".
