

# Digital Capture Template Wizard

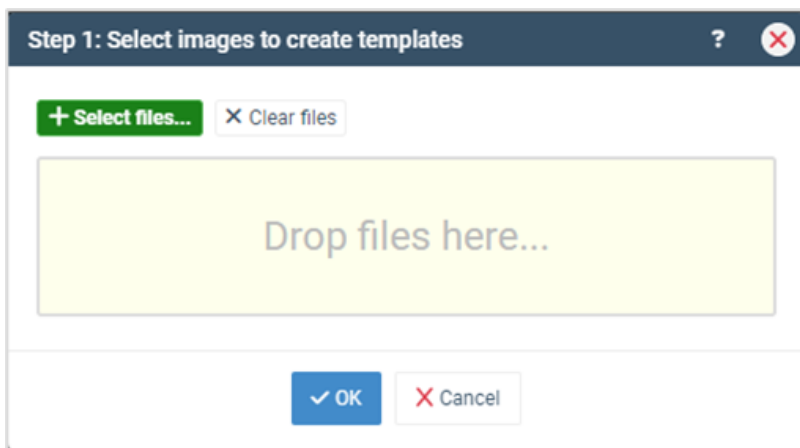

Last Modified on 04/15/2024 3:37 pm EDT

## Using the Digital Capture Template Wizard:

- Access the wizard by clicking Settings > Accounts Payable > Digital Invoice Templates
- Highlight the Master Template
- Click “Edit”
- The “Edit Digital Invoice Capture Template” page will display

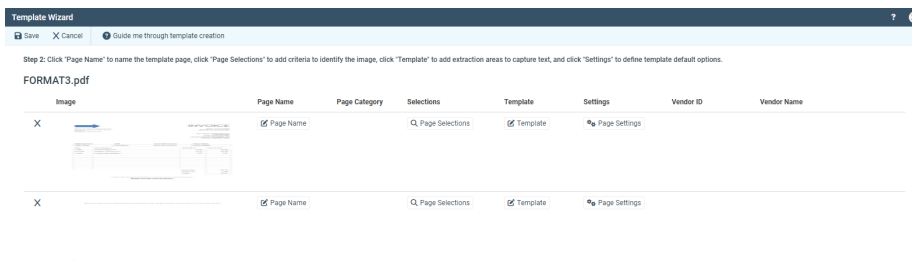

- Click Template Wizard
- The Template Wizard file selection menu will open
  - Step 1: Select images to create templates

- Files may be selected from the user’s computer or dragged/dropped into the menu, and when selected will be listed in the menu

- Click “OK”
- The Template Wizard will open displaying selected file(s)

- Step 2: Name the template page(s), add Page Selections, add extraction areas to capture text, and define default options

- Click “Page Name”
  - (Optional) Enter a template category (utilized in template page list for reference purposes)
  - Enter a Page Name to label the template page being created

- Click “Save”
- Click “Page Selections”

- These are the parameters used by the system to know when to apply the template

instructions being created

- Click “New” icon:  

- Select a column type:
  1. Text in Image: identifies a location in the image within which specific text should be present. If present, the system will apply the template instructions for Capture
  2. Image name: the name applied to the image upon capture. By default image names are the original filename + .00000X.png, where X is the page number of the file.
  3. File Name: the file name of the image being captured
- Select a comparison: how the specified column should be compared to the entered value
  1. (Default) Contains: the system will look for if the specified column merely contains the entered value
  2. Other options:
    - Equal to, Not equal to, Greater than or equal, Greater than, Less than or equal, Less than, Does not contain, Begins with, Does not begin with, Ends with, Does not end with, Like, Not like, Is nothing, Is not nothing
- Multiple Page Selections may be entered to allow for multiple scenarios in which the template should be applied
- Click “OK”
- Click “Template”

- Add all template extraction instructions (See “[Adding Template Pages](#)” steps for “Adding Text Extraction Fields”)
- Click “Page Settings”

- Establish default settings (See [“Adding Template Pages”](#) steps for “Settings (adding defaults)”
  - Click “Save”
  - The “Edit Digital Invoice Capture Template” screen will display containing the template(s) created using the Template Wizard
  - Click “Save” to store all changes made to the Master Capture Template
-
